Arabic, Persian / Dari, Ukrainian, Russian, Polish, English, Turkish

Info stands (at fairs, events...)

Current challenges and changes Austria and Lower Austria are facing

- High costs (food, rent, energy, ...)
- Lack of skilled workers at the labour market
- Lack of mobility in the rual areas
- Lack of (child)care services
- Health problems
- Demographic problems
- Migration unequal treatment of migrates
- Poverty in old age especially for women
- Climate change

• ...

Impact of these challenges on the work in educational counselling and career guidance

- Clients have more than one problem
- Lack of connection offers for the clients
- More Clients with health problems
- Frustrated (agressive) clients
- Unsecure working conditions (project funding)
- Rising costs for mobile and outreached counsellings

Model of green guidance

"Career guidance has so far mainly served as a link between the economy (thus also the goal of economic growth) on the one hand and the promotion of individualistic values of career development on the other.

Green Guidance could be an essential component in developing the concept of future careers and a link to social justice & sustainability because career choices, however individual, have implications far beyond the individual."

(Keynote Peter Plant, euroguidance conference Vienna 2021)

Green Guidance in Lower Austria - 6+ Approaches

- Networking and cooperation with "Green" stakeholders and "Green" companies — e.g. knowledge transfer
- "Green" strategy development e.g. "green" aspects in the mission statement, measuring success ("Did I mention "green" criteria during the consultation?")
- "Green" guidance e.g. raising awareness and motivating customers for "green" education and career paths, introducing sustainability goals as part of the decision-making tool.

Green Guidance in Lower Austria -6+ Approaches

Cooperation with politics & administration

e.g. be partner in projects

- "Green" public relations
 - e.g. highlighting "green" career paths and testimonials
- Making your own work "greener"
 - e.g. (e-)car-sharing for mobile and outreach counselling

Green Guidance in Lower Austria - "Green Jobs"

- Cooperation with the environmental department of the province of lower Austria
- Project phase No. 1 young people aged between 13 and 18
- Online platform <u>greenjobs-noe.at</u>
- Workshops (age 13 15, age 16 18) material for multipliers

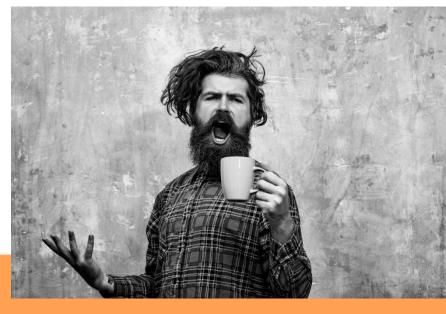

Limitation of green guidance

- Matching between fundings and clients
- Matching between clients, skills and labour market

- Dependent on funding agencies
- Mobile and outreached counsellings in rual areas

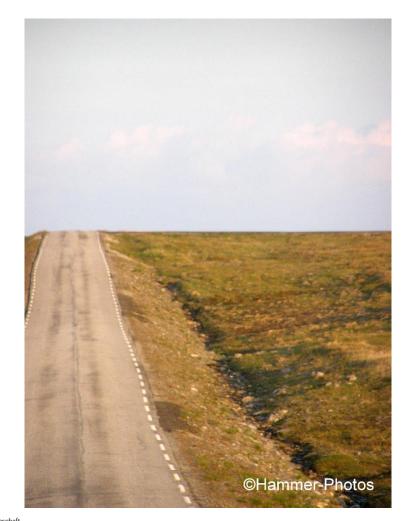

But

- ... even if it is not the solution to all problems, it is important to integrate this approach into daily work.
- ... for some clients the offers fit:
 - search for meaning,
 - > increase monthly income,
 - > get a job in the region,
 - > improvement of one's life,
 - **>**

And ...

... a lot still needs to be done here:

- from the government (flexible support, ...),
- from the companies (working times, transport options, ...),
- support for flexible learning support,

•

Next steps in our work

- Green jobs Project phase No. 2 focus on vocational reorientation of adults
- Call for the new project phase 2023 2026 cross sectional targets:
 - > insert a working group green guidance
 - > trainings for the career counsellors
 - keeping an eye on our mobility
 - > sensitise clients to this issue
 - working in a resource-saving way
 - > networking

Thank you for ...

- ... listening
- ... participating
- ... discussing!
